## Education:

---

**Azerbaijan Technical University** 2015 - 2017  
Automation Processes Engineering(Machinery), Master

**Azerbaijan State Oil Academy** 2010 - 2014  
Automation Processes Engineering, Bachelor

## Work Experience:

---

**Unikrn, Entain, Remote, Germany** 2022 - 2023

- As a Senior Software Engineer(Backend) for Unikrn, I am responsible for designing, implementing, and maintaining microservices using RabbitMQ and Redis in a microservices architecture. This involves collaborating with cross-functional teams such as Product Management, UX/UI Design, and DevOps to deliver high-quality software products that meet the needs of e-sports and gambling platforms.
- Developing APIs, improving existing functionality, and ensuring the scalability and performance of our systems. I work closely with other teams to troubleshoot and resolve issues in production systems, while also staying up-to-date with emerging trends and technologies in the field of backend development to continually improve our workflows.
- Improved technical expertise, collaborative skills, and a commitment to delivering high-quality software products that meet the needs of our users.

**Innovative Business Products, Azerbaijan** 2019 - 2022

- Worked as a Senior Software Engineer to develop and maintain web applications such as Ticket Selling Software, Student Management System, Clinic Management Software, E-commerce, Chemist Delivery, etc.
- Mostly used PHP, JavaScript, and Node.js.
- Designed MySQL/MariaDB databases.
- Took responsibility to train newcomers to the project either on-site or by creating video content in English and Azerbaijani.

**Prosys, Azerbaijan** 2018 - 2019

- Developed Advertisement Management System working in a SCRUM team.
- Designed and maintained SQL Server database structure for the project.
- Used C#, ASP.NET Core, JavaScript, Bootstrap.
- Remotely trained Government Advertising Agency.

**Innovative Business Products, Azerbaijan** 2015 - 2018

- Created digital versions of paper books using web technologies (HTML, CSS, JavaScript).
- Making the books richer with media content and more understandable for students by adding related photos, videos, and audio.
- Developed and maintained an E-learning website where these books have been uploaded on.
- Built and maintained dozens of various websites.

## Relevant Projects:

---

**Startpoint** 2020 - 2022

- Created a multipurpose platform that combines entertainment, sports, and gym management.
- Conducted Zoom training for gym operators and project owner, and created client tutorial video.

**E-sayar - Accounting Software** 2019 - 2020

- Collaborated with an accountant to develop a web application for company accounting management.
- Conducted on-site and remote training for accountant team.

**Engossip - website to find a partner to practice speaking** 2017 - 2019

- Developed a website using Go (Golang) and JavaScript that enabled English learners to register and connect with a partner for speaking practice.
- Interviewed by Government TV to discuss the website's impact.
